Subject: TO WHOM IT MAY CONCERN

On behalf of Provincial Disaster Management Authority (PDMA), it gives me an immense pleasure to write this letter of recommendation in favour of WESS. Water, Environment and sanitation Society (WESS a non-profit NGO based in Quetta) has been partnering with PDMA in the province of Balochistan, Pakistan since 2010 in different emergency response project. WESS has successfully implemented various emergency response/rehabilitation/ recovery projects in different disasters including flood, earthquake, drought and winterization in Balochistan. Beside WESS currently is a valuable partner of PDMA for capacity and institutional strengthening in developing DMIS, various online modules and capacity building of staff.

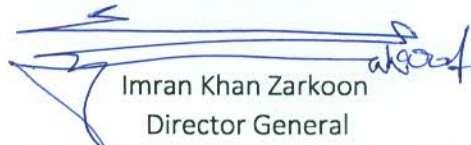

WESS has significantly contributed in decreasing the exposure of disaster affected communities through developing measure to address initial impact, as well as post-disaster, recovery needs and other phases of disaster management.

As a grassroots organization with enough organizational strengths at institutional and communities' level, it always makes endeavours to reach first on the scene of a disaster. WESS is capable of going the last mile in reaching out the vulnerable communities and preparing them for disaster to life- saving assistance.

Keeping in view WESS performance, there would be hardly any exaggeration in stating the WESS in highly suitable for partnership building should any Development organization wishes to partner with an organization attaching professional attributes.

I wish WESS the best of luck for its future endeavours.

Sincerely,

Imran Khan Zarkoon
Director General

Provincial Disaster Management Authority (PDMA), Balochistan
